

Asana Launches Asana Gov, a Secure Platform for Delivering Mission-Critical Programs

November 19, 2025 11:23 PM EST

Purpose-built work management platform to help agencies manage complex programs, meet compliance standards, and collaborate across teams securely

SAN FRANCISCO--(BUSINESS WIRE)--Nov. 19, 2025-- [Asana, Inc.](#) (NYSE: ASAN), a leading work management platform for human + AI collaboration, today announced [Asana Gov](#), a FedRAMP-in-process platform designed to help government agencies, regulated industries, and public sector partners plan, execute, and collaborate on mission-critical work with clarity and accountability – while meeting strict federal security and compliance standards.

The stakes in government work are high—measured in mission success and public trust. Yet many agencies still rely on siloed data, manual workflows, and legacy systems that slow program execution and make collaboration harder. Asana Gov connects teams, tools, and mission objectives in one secure workspace—breaking down silos, driving change, and making it easy to execute on mandates securely and in compliance with federal standards.

How Asana Gov Supports Mission-Critical Work

Designed for government organizations with multiple departments and programs, Asana Gov uses the Asana Work Graph® to map who is doing what work, by when, how, and why—giving teams a clear, connected view of work and ownership across initiatives. With this context, agencies can:

- **Turn goals into action:** Connect all work to strategic goals with clear owners, timelines, and progress tracking, so teams can see how their efforts ladder up across departments and programs.
- **Enable cross-department execution:** Manage work across agency teams, such as through work intake and program management, across departments and delivery teams in one secure workspace built for collaboration and compliance.
- **Respond quickly to change:** Adapt to new mandates, leadership shifts, or evolving needs with real-time dashboards and AI-powered updates that surface progress, risks, and dependencies—so teams can stay aligned and keep programs on track.

“Government work is among the most consequential in the world, yet the tools public servants rely on often slow them down,” said Arnab Bose, Chief Product Officer at Asana. “Asana Gov is built to remove that barrier. It empowers teams to not just manage work, but to execute on their mission with the clarity, speed, and security today’s public sector demands. When we free public servants from administrative complexity, they can focus on what truly matters: serving the public.”

Built for Secure, Scalable Collaboration

Asana Gov is built to meet federal security standards and is targeted to operate in a FedRAMP Moderate environment (currently designated “In Process”). Cloud-based and quick to deploy, it helps agencies plan, track, and report on work with shared visibility and built-in safeguards such as role-based access controls, audit trails, and multi-factor authentication. Teams can start small—with a single workflow or project—and expand securely across departments and programs as adoption and use cases grow.

Expert Perspectives

“The hardest part of innovation in government isn’t always technology—it’s getting buy-in across leadership, IT, and program offices. A FedRAMP-compliant, easy-to-use platform like Asana Gov bridges that divide. It gives IT leaders the security they need while giving employees a tool they’ll actually adopt, turning modernization from aspiration into measurable progress.”

- Jacques Newgen, Chief Service Delivery Officer of Definitive Innovative Solutions; Founder and CEO of Fluidity Concepts LLC.

“Modern government isn’t just about doing the work—it’s about building public trust. When work, goals, and outcomes are visible in one place like Asana, it empowers every government employee to tell the story of how their day-to-day work delivers for citizens and society.”

- Paul Kruchoski, Director, Guidehouse.

Availability

Asana Gov is expected to be available beginning mid-December 2025 to U.S. federal, state, and local government agencies, as well as government contractors, education institutions, and global organizations in regulated industries. It’s listed on the FedRAMP Marketplace as “In Process” and is expected to be available via GSA Schedule contracts through partners including Carahsoft. In addition to platform licenses, rollout support and flexible plans tailored to government needs will be available.
